Delivering Exceptional Products and Software Solutions

Product Development

From ideation and flawless UI/UX design to immersive experiences powered by cutting-edge technologies, we make your idea work in the most extraordinary way.

Software Engineering

Get expert consultation and engineering for custom, industry-focused software development, powered by AI/ML and more emerging technologies.

Mobile App Development

We redefine mobile experiences with bespoke native and hybrid apps, infused with AR, VR, gamification, AI, and personalized features —all crafted by our world-class mobile team.

Web App Development

We design and build web solutions for individuals, businesses, and global leaders, going beyond traditional websites to deliver high-impact digital experiences.

Legacy Modernization

Modernize apps, automate tasks, and boost efficiency with expert legacy system migration, leveraging advanced technologies for scalability and cost savings.

DevOps

We provide comprehensive DevOps services, including Infrastructure as Code (IaC), CI/CD, Configuration Management, and expert DevOps consulting and training for seamless delivery.

Case Studies

Discover real-world success stories of Transforming Challenges into Innovative Solutions through our Technology Excellence.

Building a modern, tech-first platform that reduces insurance complexities.

Challenges:

- Building an all-in-one solution that seamlessly connects lenders, agents, and customers to help users find the best insurance policies.
- Creating a secure and reliable platform to manage insurance needs, building trust, and safely storing essential documents in one place.
- Complex Technology Integrations to ensure that platforms operate efficiently.

Value Delivered:

- A crafted mobile app and a 4 distinct website interfaces are designed to cater to customers, agents, and administrators, along with a centralized admin panel.
- Thoughtfully designed and developed to make insurance shopping and management comfortable and frustration-free.
- AI features, including insurance verification, smart savings, and an advanced shopping engine delivering personalized quotes to users.
- AWS Cloud integration for smooth experience.

RainbowMe

AR application that makes kids learning an interactive and fun experience.

Challenges:

- The primary challenge was crafting an immersive, interactive experience for children aged 2-12 that seamlessly blends education and entertainment.
- Designing captivating 3D models and animated narratives that would truly engage young users.
- Ensuring that the app remains simple yet captivating, with real-time engagements, interactive learnings, and smooth functionality across a wide range of devices.

Value Delivered:

- AR app helping kids on how to read and learn new stories in a complete engaging and interactive way.
- From 3D characters to the overall UI/UX delivery, this AR app not only fosters learning but also deepens children's understanding of social, economic, cultural, and ethnic nuances in an engaging and meaningful way.
- A solution that helps even teachers and parents to keep their kids engaged and curious to enhance more in reading exercises.

Enterprise Solution, revolutionizing Direct Primary Care (DPC) across the US.

Challenges:

- Designing a seamless and intuitive interface to ensure smooth navigation between Healthcare2U's services and primary care functionalities.
- Understanding the complexities of the healthcare marketplace to provide users with tools to manage medical expenses effectively.
- Creating a robust admin panel to enable centralized management for both Healthcare2U and Prime Care operations.

Value Delivered:

- Crafting user-friendly interfaces for seamless healthcare navigation.
- Developing intuitive and responsive platforms for end-users.
- Building robust systems to manage healthcare operations and expenses.
- Ensuring a flawless and error-free user experience.

Distinctive 360° VR Experiences, connecting Sports Teams and their Fans.

Challenges:

- Developing custom 360° VR content that provides fully immersive visuals enhancing shopping experience to the sports fans.
- Integrating virtual tours that provides direct access to merchandise, while ensuring a seamless shopping experience across all platforms.
- With complex virtual environments and multiple navigational paths, ensuring smooth navigation was crucial.

Value Delivered:

- Integrating personal avatars, this app allows sports enthusiasts to interact with players and fellow fans in a virtual community, creating a sense of connection and engagement.
- Interactive shopping experiences for tickets, merchandise, and other club-related products directly within the virtual environment.
- Admin panel designs allowing effective user engagement, content updates, merchandise sales, and virtual interactions.

FETCH.

Smart Pet Solutions that reunite Pet Owners with their Furry Friends.

Challenges:

- Developing a unique Pet Identity System using QR code technology to establish a unique identity for each pet.
- Building a user-friendly web platform that allows pet owners to generate QR codes effortlessly.
- Enabling seamless interaction between pet owners and pet finders to ensure quick and efficient recovery of lost pets.

Value Delivered:

- Designed and developed a seamless website with dedicated Frontend, Backend, and Admin Panel, offering intuitive navigation for both pet owners and finders.
- Implemented a robust QR Code Generation feature that allows pet owners to register their pets and create unique QR codes with an added layer of security.
- Enabled profile management capabilities for pet owners and finders, allowing them to update their contact details, pet information, and easily report missing or found pets via the platform.

Industry

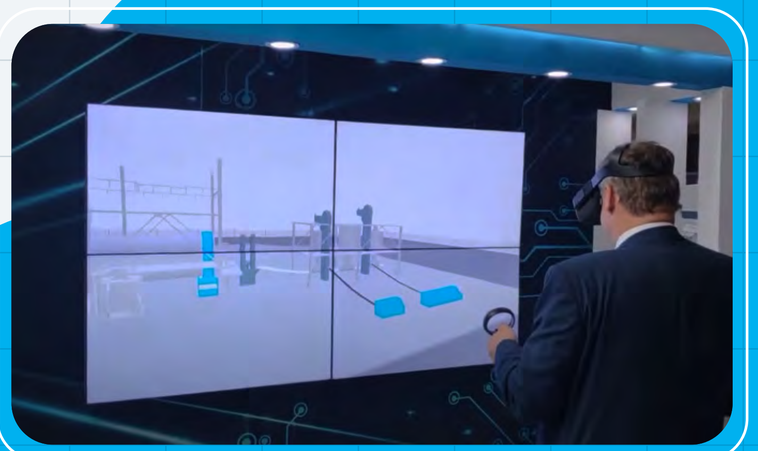

Retail & E-commerce

Result:

Helps pet owners quickly recover lost pets with secure QR codes, ensuring a smooth and fast reunion process with minimal effort.

BEUMERGROUP

A 360° Immersive Machinery Demonstration Experience for Intralogistics Systems for BEUMER.

Challenges:

- Traditional display methods, including brochures, videos, and scaled-down models, lacked the immersive experience needed to effectively showcase BEUMER's advanced machinery and complex material handling systems.
- Traditional presentations could not fully convey the intricate workings of BEUMER's solutions at exhibitions and events.

About Project:

Country

Germany

Industry

Manufacturing

Value Delivered:

- **Virtual Reality (VR) Walkthrough:** A 360-degree interactive experience that allowed visitors to explore BEUMER's machinery and logistics solutions as if they were on a real factory floor.
- User-friendly navigation to help visitors seamlessly interact with the equipment at different angles and zoom levels.
- **Augmented Reality (AR) Integration:** An interactive AR model that enabled visitors to visualize BEUMER's machinery on tablets and smartphones.

Result:

Enhanced Visitor Experience:
Attendees could explore BEUMER's solutions in a highly engaging and interactive way, leading to deeper understanding and retention.

KISTAG
Innovatives aus Holz

AR VR Virtual Try-On Solutions for KisTAG's Unique Kitchen Interior Designs and Decor.

Challenges:

- KisTAG, a leading interior design company in Switzerland, sought to enhance the customer experience by providing an innovative way to visualize their kitchen designs and decor.

  Traditional methods, such as catalogs and showroom visits, were limiting, especially during the pandemic.

About Project:

Country
Swizterland

Industry
Interior & Packaging Manufacturing

Value Delivered:

- **Virtual Reality (VR) Experience:**
  A fully immersive VR environment allowing users to explore various kitchen layouts and designs and plan their interior virtually.

  Integration with VR headsets to provide a realistic walkthrough of the kitchen space.

- **Augmented Reality (AR) Application:**
  An AR app enabling users to customize kitchen furniture and appliance colors in real-time.

  Features allowing users to move around and interact with the virtual kitchen.

Result:

Increased Engagement:
The interactive nature of the solution boosted customer engagement and satisfaction and continued client retention even during the pandemic.
